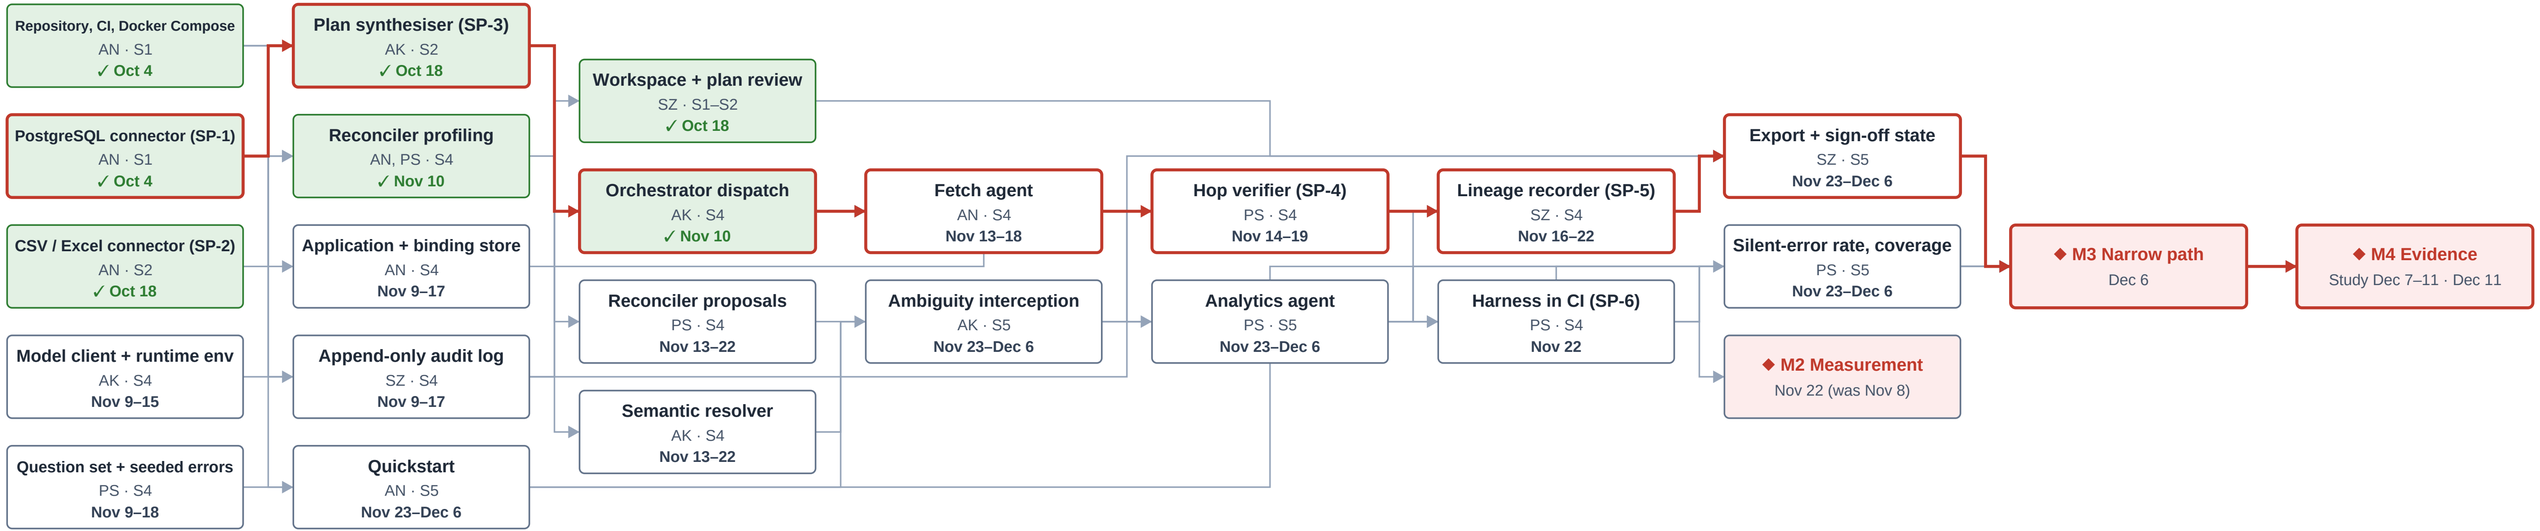
PERT chart for CMPE 295A (Fall 2026)

Task dependencies and critical path to milestones M2, M3 and M4 · status as of November 12, 2026



done (date) · to do (planned window) · critical path · milestone

Columns follow dependency order, not dates. Critical path: PostgreSQL connector → plan synthesiser → orchestrator dispatch → fetch agent → hop verifier → lineage recorder → export and sign-off → M3 → study → M4. The model client must land before the fetch agent.
